9	Upper soft skimmer seal	2	P61286
10	Lower soft skimmer transparent seal	2	P61355
11	Soft skimmer wall fitting nut	1	P61287
12	Opened wrench	1	P61317
13	Teflon tape	1	
14	Lower skimmer fitting	1	
15	Ball valve	1	H47017
23	Rigid body (lower section)	1	P61314

Opened wrench (12) for installing the soft skimmer connections.

Skimmer connections

Wind at least three layers of Teflon tape around the threads of the soft skimmer wall fittings (8). Slip the upper soft skimmer seal (9). Insert through the inside hole of the rigid body lower section of the skimmer (23). Slip a transparent seal (10) into the skimmer wall fitting and insert the rigid body section of the skimmer into the lower soft skimmer section. Screw wall fitting nut (11) onto the lower skimmer wall fitting using the opened wrench.

Option A - Screw the lower skimmer fitting (14) into the soft skimmer wall fitting. Insert a hose and fix it in place with a stainless steel clamp.

Option B - Screw a ball valve to the soft skimmer wall fitting. Insert a hose and fix it in place with a stainless steel clamp. Ensure to close the valve before filling the pool.
